

Tashkent to host training in computer technology in carpet weaving

In the capital of Uzbekistan, 14-28 February will be training in the use of special software Galaincha for designers, specialists in the design of handmade carpets. It is reported IA "Jahon".

Master patterns of Uzbekistan will be trained under the guidance of coaches - specialists in working with this computer program Puzha Shrestha and Padma Tuladhar. Coaches are invited to Tashkent representative of the German Society for International Cooperation.

This project aims to improve the process of developing original and high quality woven products manufactured in Uzbekistan.
